San Francisco Bay Area

## Summary

EZeeBUY™ is set to change the world of mobile shopping. With the EZeeBUY™ app, the photo is king. Using the camera on their smartphone device, consumers can take a photo of any desired product they see — or even share an online photo — and immediately receive the best deal for it, wherever in the world that might be.

The Internet forever changed the way consumers shop. Smartphone devices and applications transformed the shopping landscape even further. The next step in this digital revolution lies with a simple photo combined with artificial intelligence.

When the iPhone was introduced in 2007, it created an entirely new user experience from existing technologies that quickly became the gold standard for all smartphone devices. EZeeBUY™ aims to do the same, combining social media features with a global lifestyle commerce platform driven by artificial intelligence for the EZeeBUY™ app; creating an entirely new buying experience for hundreds of millions of EZeeBUY™ customers from around the world.

EZeeBUY™ for the Modern Digital shopper
